About this catalogue

INTRODUCTION

Built for formulators who need a straight answer.

Nexon Inc. supplies performance additives, masterbatches, fillers and specialty agents used across film, packaging, injection moulding and industrial compounding. This catalogue groups our range into six working categories, in the order a formulator typically reaches for them — from stabilisation through to specialty performance agents.

Grades, packing sizes and technical data sheets are available on request for any product listed here — reach out to our team for pricing and lead times specific to your application.

CONTENTS

01	Stabilizers	03
02	Functional Additives	03
03	Processing Additives	0
04	Masterbatches & Colorants	4
05	Fillers & Reinforcements	0
06	Specialty Additives	05
		05

01 — 02 / Stabilizers & Functional Additives

01 Stabilizers

5 GRADES

PRODUCT	FUNCTION
UV Stabilizers / HALS	Protects polymers from UV degradation and surface chalking
Heat Stabilizers	Maintains resin integrity during high-temperature processing
Light Stabilizers	Reduces photo-oxidative breakdown from prolonged light exposure
Antioxidants	Slows thermal and oxidative degradation across the resin lifecycle
Antiozonants	Guards rubber and elastomer compounds against ozone cracking

02 Functional Additives

10 GRADES

PRODUCT	FUNCTION
Anti Block	Prevents film layers sticking together during storage and handling
Anti Static	Dissipates static charge on film and packaging surfaces
Anti Fog	Maintains surface clarity in humid or chilled packaging
Anti Bacterial	Inhibits microbial growth on treated plastic surfaces
Slip & Non-Slip	Tunes surface friction for film and sheet handling
Impact Modifier	Improves toughness and resistance to impact fracture
Flame Retardants	Slows ignition and flame spread in finished components
Antifoaming Agents	Controls foam formation during compounding and extrusion
Clarifying Agents	Enhances optical clarity in polypropylene applications
Nucleating Agents	Refines crystalline structure for faster, uniform moulding

03 — 04 / Processing Additives & Masterbatches

03 Processing Additives

7 GRADES

PRODUCT	FUNCTION
PPA — Polymer Processing Aid	Reduces melt fracture and improves extrusion output
Plasticizers	Increases flexibility and workability of rigid polymers
Lubricants	Eases flow and reduces friction during processing
Mold Release Agents	Enables clean part release from moulds and dies
Coupling Agents	Strengthens the bond between resin and filler particles
Dispersants	Improves distribution of pigments and fillers through the melt
Flow Enhancers	Lowers melt viscosity for easier processing

04 Masterbatches & Colorants

6 GRADES

PRODUCT	FUNCTION
OB Masterbatch	Optical brightener for whiter, brighter finished products
Black & White Masterbatch	High-opacity base for consistent black and white shades
TiO ₂	Titanium dioxide pigment for opacity and brightness
Color Masterbatch	Custom colour matching across resin systems
Filler Masterbatch	Cost-effective bulking without compromising performance
Additive Masterbatch	Carrier-based dosing of functional additives

05 — 06 / Fillers, Reinforcements & Specialty Additives

05 Fillers & Reinforcements

4 GRADES

PRODUCT	FUNCTION
Calcium Carbonate	Improves stiffness and reduces material cost
Talc	Enhances rigidity and dimensional stability
Silica	Reinforces compounds and improves surface properties
Glass Fiber	Delivers high strength-to-weight reinforcement

06 Specialty Additives

5 GRADES

PRODUCT	FUNCTION
Biodegradable Additives	Promotes controlled degradation of treated plastics
Recycling Compatibilizers	Improves compatibility between recycled resin streams
Conductive / Antistatic Agents	Provides controlled electrical conductivity
Oxygen Scavengers	Extends shelf life in barrier packaging films
Foaming / Blowing Agents	Generates cellular structure in foamed plastics

Notes — Specifications, packing sizes and grades are subject to change without notice.
Current technical data sheets are issued on request for any product listed in this catalogue.

WORKING WITH NEXON INC.

- Technical data sheets and sample quantities issued on request for any grade in this catalogue.
- Pricing and lead times confirmed at the time of enquiry, based on grade and order volume.
- Custom masterbatch colour matching and additive dosing available for qualified order volumes.
- Domestic and export shipments supported across textile, packaging and industrial compounding customers.
